

MAP A.1 | Legislative Elections in Lebanon (6 May 2018)

MAP A.2 | Information and Communication Technologies. ICT Development Index 2017

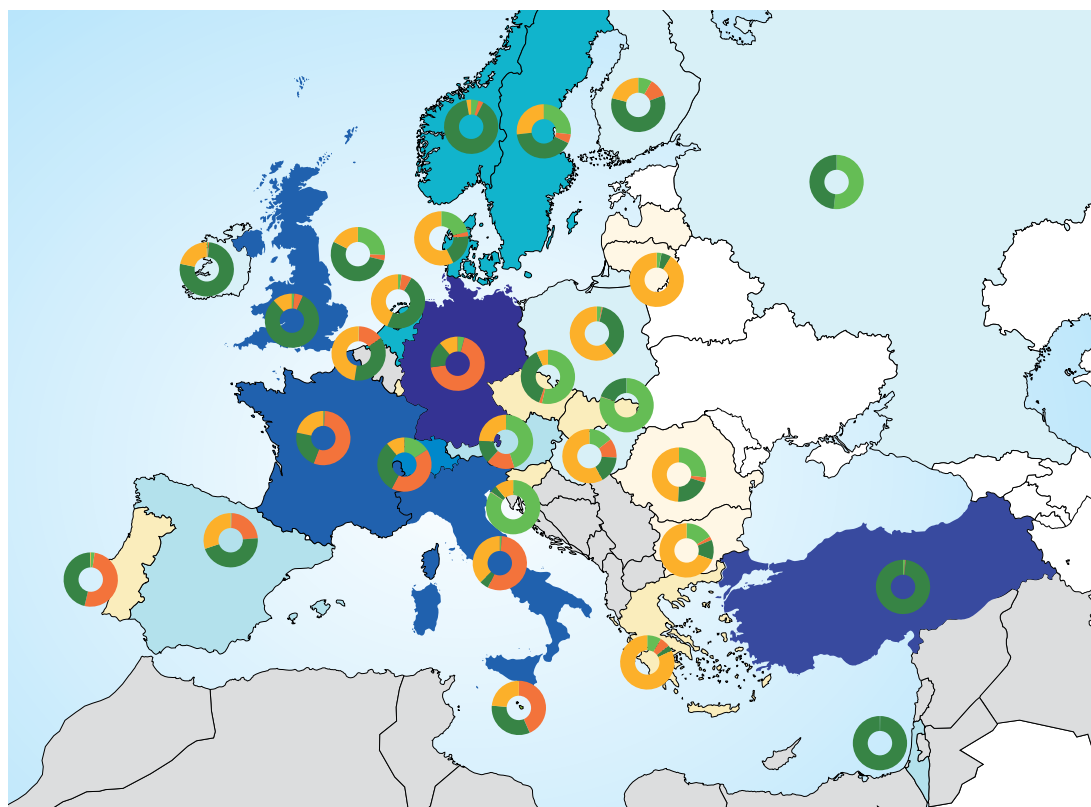

Access sub-index captures ICT readiness and includes five indicators: (fixed-telephone subscriptions, mobile-cellular telephone subscriptions, international internet bandwidth per Internet user, households with a computer, and households with Internet access). **Use sub-index** captures ICT intensity and includes three indicators (individuals using the Internet, fixed-broadband subscriptions and mobile broadband subscriptions). **Skills sub-index** seeks to capture capabilities or skills that are important for ICTs. It includes three proxy indicators (mean years of schooling, gross secondary enrolment, and gross tertiary enrolment).

MAP A.10 | Economic Recovery and Jobs in European Countries

Temporary¹ Employees as Percentage of the Total Number of Employees

More than 20%	From 15% to 17.5%	From 10% to 12.5%	From 5% to 7.5%
From 17.5% to 20%	From 12.5% to 15%	From 7.5% to 10%	Less than 5%

Long-term Unemployment Rate²

More than 10%	From 6% to 8%	From 2% to 4%
From 8% to 10%	From 4% to 6%	Less than 2%

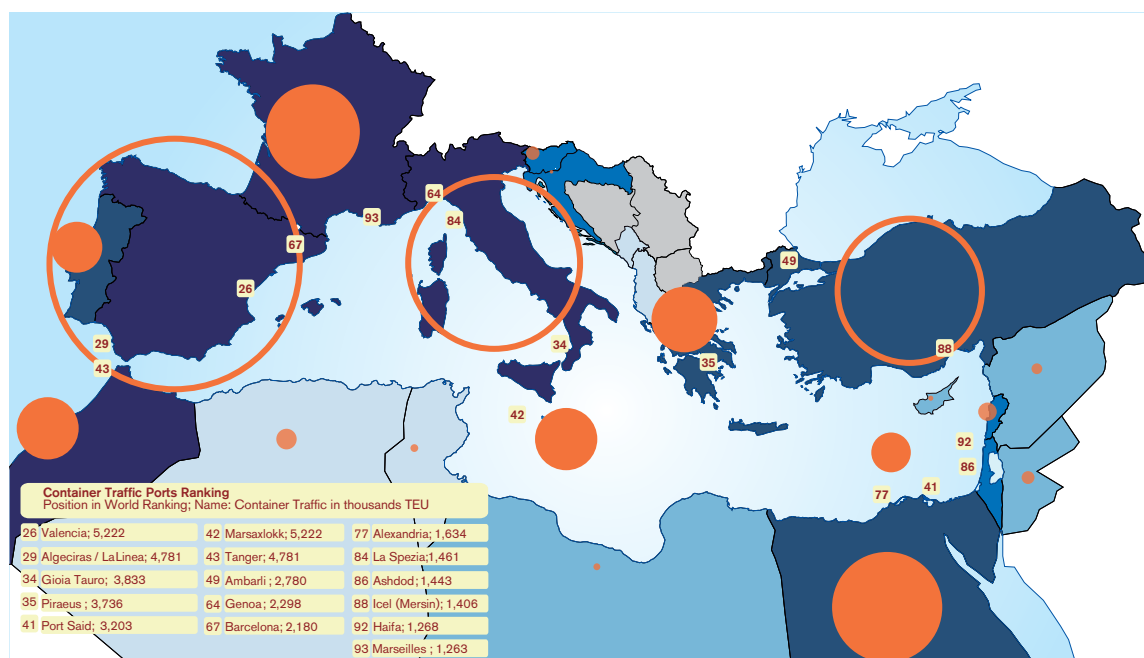

Inability³ to Afford Paying for One Week Annual Holiday away from Home

Households Making Ends Meet with Great Difficulty⁴

Notes: 1. A job is temporary if its end is determined by specific date, completion of a task or return of another employee. 2. Long-term unemployment rate refers to 12 months and more, people aged at least 15, without work for the next two weeks but available to start work and that are seeking work. 3. The percentage of people who cannot afford paying for one week annual holiday away from home, regardless if they want it. 4. Percentage of people that see themselves as having great difficulties in making ends meet, assessment based on a subjective non monetary indicator (values from 1 to 6).

Container Port Throughput (thousands TEU), 2016

Linear Shipping Connectivity Index (LSCI), 2017

Container port throughput measures the total n. of containers handled by the ports of a country, expressed in 20-foot equivalent units (TEU). **LSCI** indicates a country's integration into global liner shipping networks. It is built on the: a. n. of ships; b. total container-carrying capacity of those ships; c. maximum vessel size; d. n. of services; e. n. of companies that deploy container ships on services from and to a country's ports.

Number of Ships of the Merchant Fleet, 2017

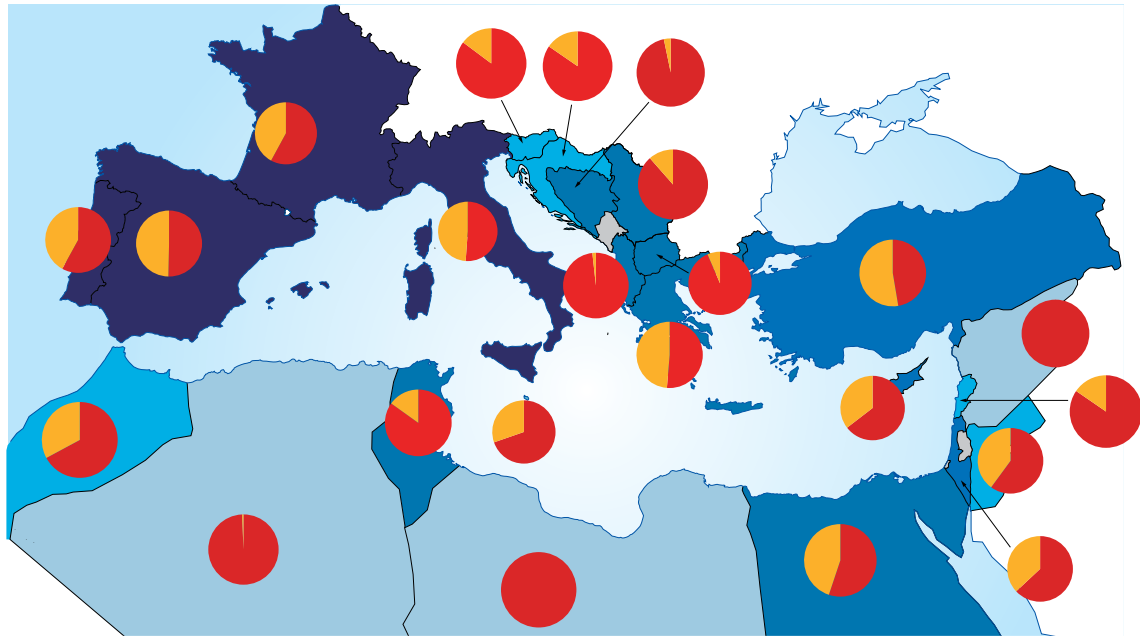

Quality of Port Infrastructure

It measures business executives' perception of their country's port facilities. Scores range from 1 (extremely underdeveloped) to 7 (efficient by international standards). Respondents in landlocked countries were asked how accessible port facilities are (1 = extremely inaccessible; 7 = extremely accessible).

MAP A.12 | Financial Integration

Financial Development (FD) Index, 2015

FD groups the Financial Institutions (FI) Index and the Financial Markets (FM) Index. FI and FM capture each of the three dimensions: depth, access and efficiency of financial institutions or financial markets

Relative Contribution of Financial Institutions (FI) Index and Financial Markets (FM) Index to Financial Development Index
