

MAP A.7b | SDG 6 Water and Sanitation, SDG 6.4.2. Water Stress

Water Stress* (2021)

- Less than 10
- From 10 to 25
- From 25 to 50
- From 50 to 100
- From 100 to 150
- More than 150

SDG 6.4.2. Water Stress:

Ratio between total freshwater withdrawn by all major sectors and total renewable freshwater resources, after taking into account environmental water requirements.

*The charts show the evolution of water stress in Mediterranean countries between 1995 and 2021.
